1. Introduction

1.1 Purpose of the System

The PPM platform aims to replace fragmented spreadsheets, emails, and manual follow-ups with a single centralized system for efficient project management. It enables real-time tracking of project progress, milestones, and pending activities while providing centralized and version-controlled storage for all project documents. The platform also establishes role-based access for authorized users and department/management personnel, ensuring secure and appropriate access to information. Additionally, it provides leadership with consolidated, real-time visibility across all projects and departments, supporting better monitoring, coordination, and decision-making.

1.2 Purpose of this User Manual

This manual explains how to use the PPM system in the admin role. It covers every screen and action available to an Admin user, including logging in, managing proposals and projects, tracking documents and payments, communicating through chat, viewing analytics, configuring system settings, managing user access, and managing customer records.

1.3 Intended Users

This manual is intended for users assigned the admin role within the PPM system. Admin users have the broadest access in the system, including the ability to manage proposals, acknowledge submissions, configure workflow stages, manage user accounts and roles, and manage customer data.

2. System Overview

PPM is a web-based application accessed through a browser, available only within the CMTI internal network (intranet) and not accessible over the public internet. After logging in, the Admin is presented with a left-hand navigation sidebar that provides access to all modules in the system. The main modules available to the Admin role are:

- **Proposals / Projects** — the main dashboard for submitting, tracking, and managing proposals and their conversion into projects.
- **Chats** — a messaging module for communicating with Project Coordinators, Group Heads, and Centre Heads about specific proposals or projects.
- **Projects Documents** — a document and stage-tracking module for active projects, organized by project category.
- **Acknowledge Proposals** — a review queue where the Admin accepts or rejects proposals submitted by Project Coordinators.
- **Overall Analytics** — visual charts and summary reports on proposal and project performance.
- **Configuration** — system settings for workflow stages, centres, groups, and manpower rates.

- **Notification** — a real-time feed of system alerts such as invoice reminders and approval updates.
- **Access Control** — user account management, including roles, centres, and groups.
- **Customers / Customers (Multi)** — customer record management, including contact details and tax identifiers.

Each of these modules is explained in detail in the following sections.

3. Login

3.1 Logging In

The PPM login page requires a registered CMTI username or email address and a password.

Fig. 3.1 — PPM Login Page

How to Log In

1. Enter your registered CMTI email address (e.g., name@cmti.res.in) in the Username / Email Address field.
2. Enter your password in the Password field.
3. Optionally, select the "Show password" checkbox to verify your text entry before submitting.
4. Click the Sign In button to log in to the system.

3.2 Resetting a Forgotten Password

If you have forgotten your password, use the Forgot Password option on the login page to reset it through a 3-step verification process: Email, Verify OTP, and New Password.

Fig. 3.2 — Reset Password Modal

How to Reset Your Password

1. Click "Forgot Password?" on the login page to open the Reset Password modal.
2. Enter your registered email address and click "Get OTP".
3. Enter the 6-digit OTP sent to your mailbox to verify your identity.
4. Define and confirm your new password (minimum 6 characters), then log back in with your new credentials.

Note:

Passwords must be a minimum of 6 characters. Make sure to check your registered mailbox for the OTP before it expires.

4. Dashboard — Proposals / Projects

After logging in, the Admin lands on the Proposals / Projects dashboard. This is the primary working screen for tracking proposals from initial enquiry through to conversion into active projects.

Fig. 4.1 — Proposals / Projects Dashboard

4.1 KPI Cards

A row of color-coded summary cards at the top of the dashboard displays live counts across the proposal pipeline:

- **Total Submitted** — the total number of proposals/projects recorded in the system.
- **Pending** — proposals awaiting evaluation, with a rejected count shown beneath.
- **Converted to Projects** — proposals that have progressed into active projects, broken down by project category (ILP, ISP, GAP, GSP, LSP, DPP, CLP).
- **Tech Completed** — projects that have reached technical completion, broken down by category.
- **Fin Completed** — projects that have reached financial completion, broken down by category.
- **Ongoing Projects** — projects currently active, broken down by category, with Active/On Hold counts shown.

4.2 Dashboard Toolbar and Table

Element	Description
Add Proposal / Project	Opens a modal form to input a new inquiry's details, such as customer contacts, inquiry dates, and request categories.
Search Bar	Provides real-time search across customer names, proposal IDs, quote descriptions, or reference numbers.

Element	Description
Filters	Opens filter options to isolate proposals by customer type (Govt/Private), request channel, centre, group, or date ranges.
Clear Filters	Resets all applied filters and search criteria back to the default view.
Duplicate Quote Refs	Highlights proposals that share duplicate quotation reference numbers.
Import	Imports proposal data into the system.
Export	Downloads your filtered or full list of proposals as a formatted .xlsx spreadsheet for offline reporting.
Proposals Table	Lists records in a structured grid with columns for SL NO, Enquiry Date, Customer Type, Customer Name, Address, Email, and Actions.
View Details Icon (Eye)	Opens a side drawer presenting the full proposal details, linked documents, remarks history, and milestone stages.
Edit Icon (Pencil)	Opens an editor modal to modify proposal fields, adjust date records, or register negotiated quote amounts.
Actions Menu (:)	Opens a dropdown with additional row-level actions for the selected proposal, such as Delete and document generation options (currently including Quotation Generator, Acknowledgement Generator, and Allotment Sheet).

4.3 Edit Proposal

When an Admin clicks the Edit (pencil) icon on a proposal row, the Edit Proposal form opens, allowing changes to be made and saved.

Fig. 4.2 — Edit Proposal Form

The Edit Proposal form allows the Admin to update proposal details across multiple fields, including Enquiry Date, Customer Type, Customer Name, Address, Email, Phone No., Alternate Contact, Request Type, Email Reference, Quote Reference, Quote Description, Quote Date, Quote Amount, Revised / Negotiated Amount, Revised Quote Date, Revised Quote Amount, Department, and Centre, along with additional fields further down the form.

How to Edit a Proposal

1. From the Proposals / Projects dashboard, locate the proposal to be edited.
2. Click the Edit (pencil) icon in the Actions column for that row.
3. Update the required fields in the Edit Proposal form.
4. Save the updated information to apply the changes.

5. Acknowledge Proposals

The Acknowledge Proposals screen lists proposals submitted by Project Coordinators that are awaiting Admin review. A badge on the sidebar menu item and on the screen itself shows the current count of pending proposals.

ENQUIRY DATE	CUSTOMER NAME	CUSTOMER TYPE	QUOTE REFERENCE	QUOTE DATE	QUOTE AMOUNT	QUOTATION BY	DOCUMENTS	ACTION
05-08-2025	Tata Consultancy Services	Private				RAMESH B	No documents	Accept Reject ⓘ
29-07-2025	HAL Overhaul Division	Govt	NULL		NULL	SURESH SETTI	View (2)	Accept Reject ⓘ
30-06-2025	Buhler (India) Pvt Ltd	Private	NULL		NULL	SURESH SETTI	View (1)	Accept Reject ⓘ
24-04-2025	Tata Power Solar Limited, T...	Private	NULL		NULL	SURESH SETTI	View (1)	Accept Reject ⓘ
		-	NULL		NULL	NARENDRA REDDY T	No documents	Accept Reject ⓘ
		-	NULL		NULL	NARENDRA REDDY T	No documents	Accept Reject ⓘ
		-	NULL		NULL	NARENDRA REDDY T	No documents	Accept Reject ⓘ
19-05-2025	ECIL	Govt	NULL		NULL	RAMESH B	View (2)	Accept Reject ⓘ
	IDEX Cell - Nodal DPSU- HL...	Govt	NULL		NULL	HARIKRISHNA SATISH	View (1)	Accept Reject ⓘ

Fig. 5.1 — Acknowledge Proposals Screen

On this screen, the Admin can review newly submitted proposals and take one of the following actions:

- **Preview Attached Files** — open and check any uploaded Word, Excel, or quotation documents (via the Documents column).
- **Review Proposal Information** — inspect customer details, inquiry dates, quote reference, quote amount, and the coordinator who submitted the quotation.
- **Accept** — approve the proposal so it officially enters the active workflow and pipeline.
- **Reject** — decline proposals that are invalid or have incomplete requirements.

The screen also includes a search bar to locate specific proposals, and an information icon (ⓘ) in the Action column for additional proposal details.

6. Project Documents

Once the Admin assigns a Project Number to an accepted proposal, it is converted into a project and its details appear in the Projects Documents module. This module displays all active projects as cards, organized into category tabs, and provides access to each project's documents, stages, and payment tracking.

Fig. 6.1 — Projects Documents Screen

6.1 Toolbar and Project Cards

Element	Description
Search Bar & Filters	Search projects by project number, coordinator, or activity, and filter results by centre.
Category Tabs	Switch between project types: All, ISP, GSP, GAP, ILP, DPP, LSP, CLP, and Other. Each tab shows the count of projects in that category.
Project Cards	Display the project number, activity description, coordinator, and centre for each project.
View Details Button	Opens that project's full stages, documents, and payments.

6.2 View Details Tab

Clicking View Details on a project card opens a stage-by-stage breakdown of that project, from Enquiry through to closure.

Fig. 6.2 — Project View Details (Stages)

Within the View Details tab, the Admin can:

- **Track Project Progress** — view the step-by-step progress and milestone stages of the project (e.g., Enquiry, Proposal, PO, PO Acknowledgment, Project Cost Estimation Sheet, and further stages).
- **Manage Files** — upload project documents, update file versions, and preview or download attached files using the Upload button available at each stage.
- **Track Invoices & Payments** — add billing details, invoice numbers, amounts received, and payment statuses for each stage.
- **Add Notes** — add comments and remarks to any stage to keep the team updated.
- **Check Allotment Information** — view the official allotment sheet with order value, key dates, and summary information.

7. Chat

The Chats module allows the Admin to directly communicate, share project files, and track real-time message read receipts with the assigned PI (Coordinator), Group Head (GH), or Centre Head (CH) for any specific project or proposal.

Fig. 7.1 — Chats Screen

7.1 Chat Screen Layout

Element	Description
Chat List Panel	Lists all proposal- and group-related conversations, with tabs to filter by All, Proposals, Groups, or Unread.
Search Bar	Searches across proposals, groups, and messages.
Chat Threads	Within a selected conversation, separate threads are available for different roles, such as Group Head or Centre Head.
Message Panel	Displays the conversation history for the selected thread, along with the coordinator and customer details, and status labels such as "End-to-End Encrypted" and "Submitted".
Message Box	Type and send messages, or attach files, using the input box and Send button at the bottom of the panel.

8. Overall Analytics

In the Overall Analytics section, users can view visual charts and performance reports to understand overall project and proposal health.

Fig. 8.1 — Overall Analytics Summary Cards

8.1 Key Summary Cards

Displays total counts and conversion rates for Total Submitted, Pending, Converted, Tech Completed, Financially Not Completed, Financially Completed, and Ongoing Projects, each broken down by project category.

8.2 Visual Charts

Fig. 8.2 — Overall Analytics Chart View

Below the summary cards, the Analytics section offers interactive charting tools:

- **Chart Types** — switch between Bar, Pie, Donut, Line, Area, Funnel, Box, and Treemap visualizations.
- **Financial Overview** — shows the total monetary value of quotations given and purchase orders received.
- **Count vs. Amount Toggle** — switch charts instantly between viewing the number of projects (Project) or the total financial value (Amount).
- **Financial Year Filter** — filter chart data by a specific financial year.
- **Trend** — view trend data over time.

- **Reset / Full Screen / Download** — reset the chart view, expand it to full screen, or download the chart data.
- **Interactive Drill-Down** — click on any chart segment (e.g., a bar or slice) to view the exact matching proposals for that segment.

A status bar above the chart confirms which card filter is currently applied to the graph (for example, "ALL SUBMITTED PROPOSALS & PROJECTS").

9. Configuration

In the Configuration section, the Admin can customize system settings and master data used throughout the platform.

SI no	Stage Name	Access	Created At	Actions
1	Enquiry	Upload	01-12-2025	Edit Delete
2	Proposal	Upload	01-12-2025	Edit Delete
3	PO	Upload	01-12-2025	Edit Delete
4	PO Acknowledgment	Upload	01-12-2025	Edit Delete
5	Project Cost Estimation Sheet	Upload	26-02-2026	Edit Delete
6	Project Number Allotment Sheet	Upload, View Allotment Sheet	11-12-2025	Edit Delete
7	Progress	Add Remarks	01-12-2025	Edit Delete
8	Payments	Add Payments	01-12-2025	Edit Delete
9	Closure Report	Upload	01-12-2025	Edit Delete
10	Payments stages	-	09-04-2026	Edit Delete

Fig. 9.1 — Configuration: Stages

The Configuration section allows the Admin to:

- **Manage Project Stages** — add, edit, reorder, or delete the workflow milestone stages used across projects (such as Enquiry, Proposal, PO, PO Acknowledgment, Project Cost Estimation Sheet, Project Number Allotment Sheet, Progress, Payments, Closure Report, and Payments Stages). Each stage entry shows its Access type (e.g., Upload, Add Remarks, Add Payments) and creation date.
- **Manage Centres** — add and update organizational Centre names (e.g., C-WMPT, C-SMPM).
- **Manage Groups** — create and assign departmental Groups under each specific Centre.
- **Set Manpower Rates** — define standard hourly/daily rates for different job roles.

Use the Add Stage button to create a new workflow stage, and the Edit or Delete links in the Actions column to modify or remove an existing stage.

10. Notification

The Notification module provides the Admin with a real-time feed of system and activity alerts across all projects.

Fig. 10.1 — Admin Notification Center

The Admin Notification Center includes:

- **Activity Feeds** — real-time alerts for newly uploaded documents, remarks, invoice updates, and approvals. Each alert shows the related Project ID, alert type (e.g., Update, System-Invoice), and the responsible user.
- **Filters** — filter notifications by role/head (Select Head / Role) or by a specific project (Select Project ID).
- **Search** — search notification details using the search box.
- **Mark Read / Clear All** — mark individual notifications as read, or clear all notifications at once.

The unread notification count is displayed both in the sidebar menu and at the top of the Notification Center.

11. Access Control

The Access Control module allows the Admin to manage all registered users of the PPM system.

Fig. 11.1 — Access Control Screen

From this screen, the Admin can:

- **View User List** — view all registered staff members along with their email, role, centre, and group.
- **Add New User** — create new user accounts with their login details and assigned department.
- **Edit User & Role** — change a user's role (e.g., Scientist, Group Head, Centre Head, Admin) or update their assigned centre/group.
- **Delete User** — remove users who no longer need system access.
- **Search & Filter** — find users by name, email, role, centre, or group using the search bar and filter dropdowns.

12. Customer Management

The Customers module allows the Admin to maintain a master list of customer records used throughout the proposal and project workflow.

ID	Name	Customer Type	GST	PAN	TAN	Address	Email	Phone No.	Alternate Contact	Created At	Updated At	Actions
2	CMTI Internal	Govt								13-03-2026 04:44	13-03-2026 04:44	Edit Delete

Fig. 12.1 — Customer Management Screen

From the Customer Management screen, the Admin can:

- **Add Customer** — add a new customer profile with organization name, customer type, phone, email, address, GST, PAN, and TAN.
- **Edit Customer** — update existing customer contact details, tax identifiers, or addresses using the Edit link.
- **Delete Customer** — remove outdated or unused customer entries using the Delete link.
- **Search & Filter** — search customers by name, email, or address, or filter by customer type (e.g., Private vs. Government).
- **Upload Excel** — bulk-import customer records from an Excel file.
- **Auto-Fill in Proposals** — stored customer details can be quickly selected when creating new proposals to save time.

The screen displays the Total Customers count, and each row shows the customer's ID, Name, Customer Type, GST, PAN, TAN, Address, Email, Phone No., Alternate Contact, Created At, and Updated At timestamps.

13. Step-by-Step Workflows

13.1 Proposal Submission to Acceptance

1. A Project Coordinator submits a new proposal, which appears in the Acknowledge Proposals queue for Admin review.

2. The Admin opens Acknowledge Proposals from the sidebar.
3. The Admin reviews the proposal's customer details, inquiry dates, and any attached documents.
4. The Admin clicks Accept to approve the proposal into the active pipeline, or Reject to decline it.
5. Once accepted, the proposal appears in the Proposals / Projects dashboard and can progress through project stages.

13.2 Adding a New Proposal

1. From the Proposals / Projects dashboard, click Add Proposal / Project.
2. Complete the required fields in the form, such as customer contacts, inquiry dates, and request category.
3. Save the form to add the new proposal to the system.

13.3 Editing a Proposal

1. Locate the proposal on the Proposals / Projects dashboard.
2. Click the Edit (pencil) icon on that proposal's row.
3. Update the required fields, such as customer name, quotation price, work description, dates, or department.
4. Save the changes.

13.4 Tracking a Project Through Its Stages

1. From the sidebar, open Projects Documents.
2. Select the relevant category tab (e.g., ISP, GSP, GAP) or search for the project.
3. Click View Details on the relevant project card.
4. Review each stage (Enquiry, Proposal, PO, PO Acknowledgment, Project Cost Estimation Sheet, and further stages), uploading documents or adding notes as required.
5. Update payment and invoice details at the relevant stage as they become available.

13.5 Adding a New Customer

1. From the sidebar, open Customers.
2. Click Add Customer.
3. Enter the organization name, customer type, phone, email, address, GST, PAN, and TAN.
4. Save the record. The customer will now be available for auto-fill when creating new proposals.

14. Search, Filter, and Navigation

Search and filter tools are available throughout the PPM system to help the Admin quickly locate records:

Element	Description
Proposals / Projects	Search Bar (customer names, proposal IDs, quote descriptions, reference numbers) and Filters (customer type, request channel, centre, group, date ranges).
Acknowledge Proposals	Search Bar to locate specific pending proposals.
Projects Documents	Search by project number, coordinator, or activity, plus a Filter by Centre dropdown and category tabs (All, ISP, GSP, GAP, ILP, DPP, LSP, CLP, Other).
Chats	Search across proposals, groups, and messages, plus tabs for All, Proposals, Groups, and Unread.
Overall Analytics	Search & Filters panel, plus a Financial Year filter for chart data.
Notification	Search by notification detail text, plus filters for Head/Role and Project ID.
Access Control	Search by name, email, role, centre, or group, plus filter dropdowns for Role, Centre, and Group.
Customers	Search by name, email, or address, plus a Filter by Customer Type dropdown.

Navigation between modules is done through the left-hand sidebar, which remains visible on every screen and highlights the module currently in use.

15. Reports, Downloads, and Data Management

- **Export (Proposals / Projects)** — downloads your filtered or full list of proposals as a formatted .xlsx spreadsheet for offline reporting.
- **Import (Proposals / Projects)** — imports proposal data into the system.
- **Download (Overall Analytics)** — downloads chart data from the Overall Analytics screen.
- **Upload Excel (Customers)** — bulk-imports customer records from an Excel file.
- **Duplicate Quote Refs (Proposals / Projects)** — identifies proposals sharing duplicate quotation reference numbers, supporting data-quality checks.

16. Common User Actions

Element	Description
Add	Create a new record — used for proposals (Add Proposal / Project), users (Add New User), customers (Add Customer), and project stages (Add Stage).
Edit	Modify an existing record's details, available on proposals, users, customers, and configuration stages via the pencil/Edit icon or link.
View	Open full details of a record — used for proposal details (Eye icon) and project details (View Details button).
Search	Locate records quickly using the search bar available in each module.
Filter	Narrow down displayed records using dropdown filters available in each module.
Download / Export	Save data outside the system as a spreadsheet, available for proposals and analytics.
Upload	Attach documents to project stages, or bulk-import customer data via Excel.
Accept / Reject	Approve or decline a submitted proposal from the Acknowledge Proposals screen.
Delete	Permanently remove a record — available for users and customers.
Mark Read / Clear All	Manage the notification list in the Notification Center.

17. Troubleshooting / Common Issues

17.1 Unable to Log In

Confirm that you are using your registered CMTI username or email address (e.g., name@cmti.res.in) and that your password is entered correctly. Use the "Show password" checkbox to verify your entry before clicking Sign In.

17.2 Forgotten Password

If you cannot remember your password, use the "Forgot Password?" link on the login page and follow the Email → Verify OTP → New Password steps described in Section 3.2. Ensure you check the correct registered mailbox for the OTP.

Note:

This manual covers only the issues and resolutions described in the source system documentation. For any issue not listed here, please contact your system administrator.

18. Frequently Asked Questions

Q: What credentials do I need to log in?

A: A registered CMTI username or email address (e.g., name@cmti.res.in) and your password.

Q: What do I do if I forget my password?

A: Click "Forgot Password?" on the login page and complete the Email, Verify OTP, and New Password steps to reset it.

Q: How do I add a new proposal?

A: From the Proposals / Projects dashboard, click Add Proposal / Project and complete the form with customer contacts, inquiry dates, and request category.

Q: How does a proposal get accepted into the pipeline?

A: The Admin reviews it on the Acknowledge Proposals screen and clicks Accept (or Reject if it is invalid or incomplete).

Q: Where can I track documents and payments for a project?

A: Open Projects Documents from the sidebar, select the relevant project category, and click View Details on the project card.

Q: How can I communicate with a Project Coordinator, Group Head, or Centre Head?

A: Use the Chats module, which provides role-specific chat threads for each proposal or project.

Q: Where can I see overall performance across all proposals and projects?

A: The Overall Analytics module provides summary cards and interactive charts for this purpose.

Q: How do I add or manage a customer record?

A: Use the Customers module to Add Customer, Edit Customer, Delete Customer, or bulk-import records via Upload Excel.

Q: How do I manage user roles and access?

A: Use the Access Control module to add new users, edit their role/centre/group, or delete users who no longer need access.

19. Conclusion

This manual has covered the core modules and workflows available to the Admin role in the PPM system, including logging in, managing proposals and their conversion into projects, tracking documents and payments, communicating through the Chats module, reviewing analytics, configuring system settings, and managing user and customer records.

For any functionality not covered in this manual, or for issues beyond the scope of the Troubleshooting section, please contact SMPM team.
