1. Introduction

1.1 Purpose of the Application

The PPM platform aims to replace fragmented spreadsheets, emails, and manual follow-ups with a single centralized system for efficient project management. It enables real-time tracking of project progress, milestones, and pending activities while providing centralized and version-controlled storage for all project documents. The platform also establishes role-based access for authorized users and department/management personnel, ensuring secure and appropriate access to information. Additionally, it provides leadership with consolidated, real-time visibility across all projects and departments, supporting better monitoring, coordination, and decision-making.

1.2 Purpose of the User Manual

This manual explains how to use the Group Head module of the system. It covers:

- Logging into the system
- Navigating the Group Head dashboard
- Viewing proposals and projects belonging to the Group
- Viewing project and proposal details
- Using Chats
- Viewing project documents
- Viewing group notifications
- Using Group Head Analytics
- Understanding drill-down navigation
- Using filters, charts, metrics, and exports
- Understanding Group Head permissions and restrictions

1.3 Intended Users

- Group Heads who are responsible for overseeing proposals and projects belonging to their assigned group.

2. System Overview

2.1 Overview of the Application

After login, the system automatically identifies the user as a Group Head and restricts the displayed data to the Group Head's assigned group. The Group Head has view and access to the proposals and projects within their group.

The Group Head can view:

- All proposals belonging to their group
- All projects belonging to their group
- Project coordinators
- Project details
- Project status
- Project documents
- Group-related chats
- Notifications relating to their group
- Group-level analytics

2.2 Important Permission

IMPORTANT PERMISSION

A Group Head is a view-only user for proposals and projects. The Group Head cannot create proposals, cannot create proposal documents, cannot upload project or proposal documents, and cannot perform Scientist-level proposal creation activities or modify proposal records. If the Group Head needs to create a proposal or upload a document that requires Scientist-level permissions, they must log in using a Scientist account.

3. Login

3.1 Login Procedure

1. Open the Proposals & Projects Management System using this [link](#).
2. Enter the credentials issued to you by your system administrator.
3. Submit your credentials to sign in to the system.
4. The system identifies the account as a Group Head.
5. The system automatically restricts the displayed data to the Group Head's assigned group.

3.2 Required Credentials

You will need the username and password provided to you by your system administrator. If you do not have login credentials, or have forgotten them, contact your administrator or the PPM team for assistance.

3.3 Resetting a Forgotten Password

If you have forgotten your password, use the Forgot Password option on the login page to reset it through a 3-step verification process: Email, Verify OTP, and New Password.

How to Reset Your Password

1. Click "Forgot Password?" on the login page to open the Reset Password modal.
2. Enter your registered email address and click "Get OTP".
3. Enter the 6-digit OTP sent to your mailbox to verify your identity.
4. Define and confirm your new password (minimum 6 characters), then log back in with your new credentials.

3.4 Login-Related Notes

NOTE

After logging in, the system automatically identifies the user as a Group Head. All proposals, projects, documents, chats, notifications, and analytics displayed to the Group Head are scoped to their assigned group. The Group Head does not see projects belonging to other groups.

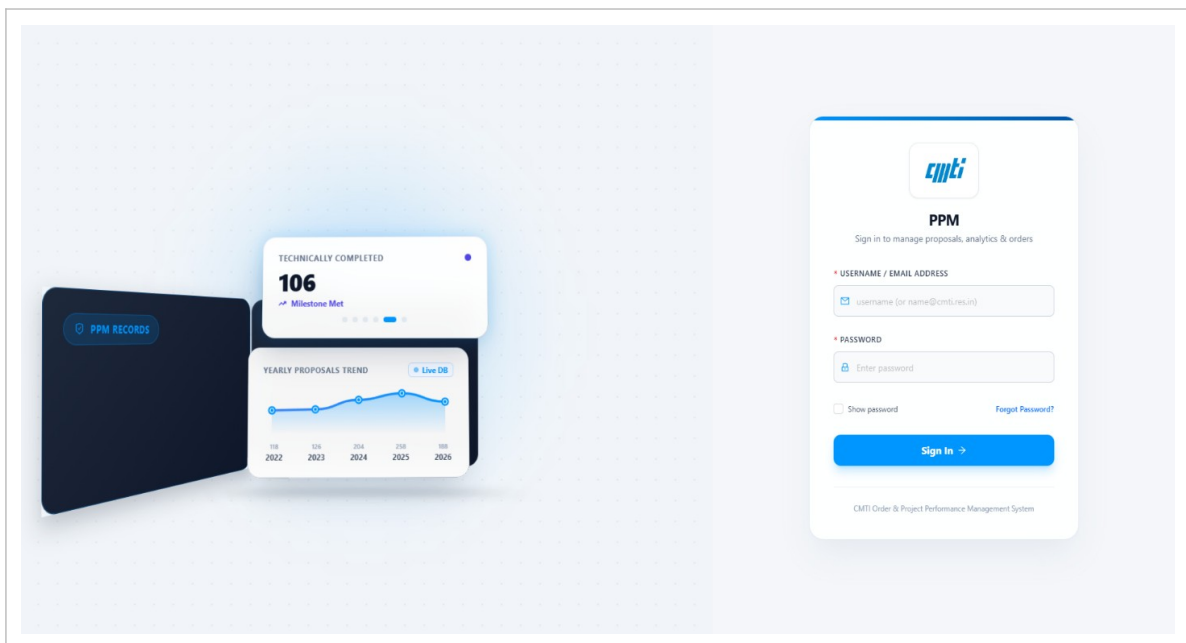

Figure 1

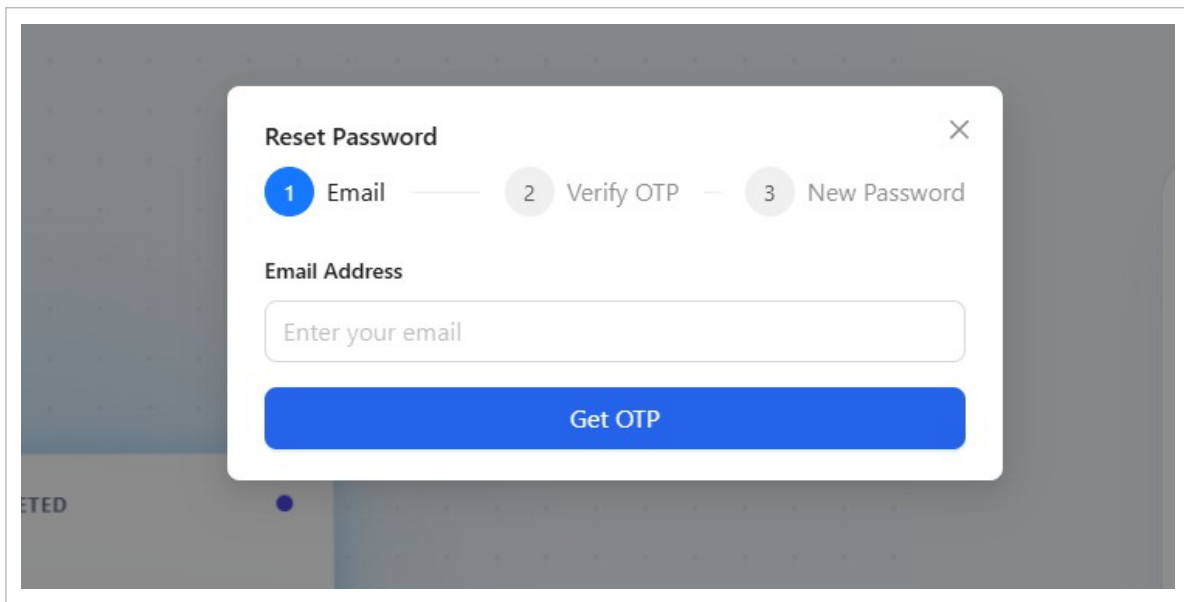

Figure 2

4. Main Navigation Menu

Once you have logged in, a navigation sidebar is displayed on the left side of the screen. This sidebar is your starting point for every task in the system and contains the following five items, in this order:

Sidebar Item	Takes You To
Proposals / Projects	Your central view of proposals and projects belonging to your group.
Chats	The messaging system for communicating with Project Coordinators and Admin regarding your group's proposals and projects.
Projects Documents	The document inventory for projects belonging to your group.
Notification	Alerts and updates relating to your group's proposals and projects, marked with a count badge.
Group Head Analytics	Your group-level analytics dashboard with KPI cards, charts, and drill-down views.

NOTE

The Notification item displays a red badge with a number showing the current count of unread or pending notifications relevant to your group. This count updates as new alerts arrive.

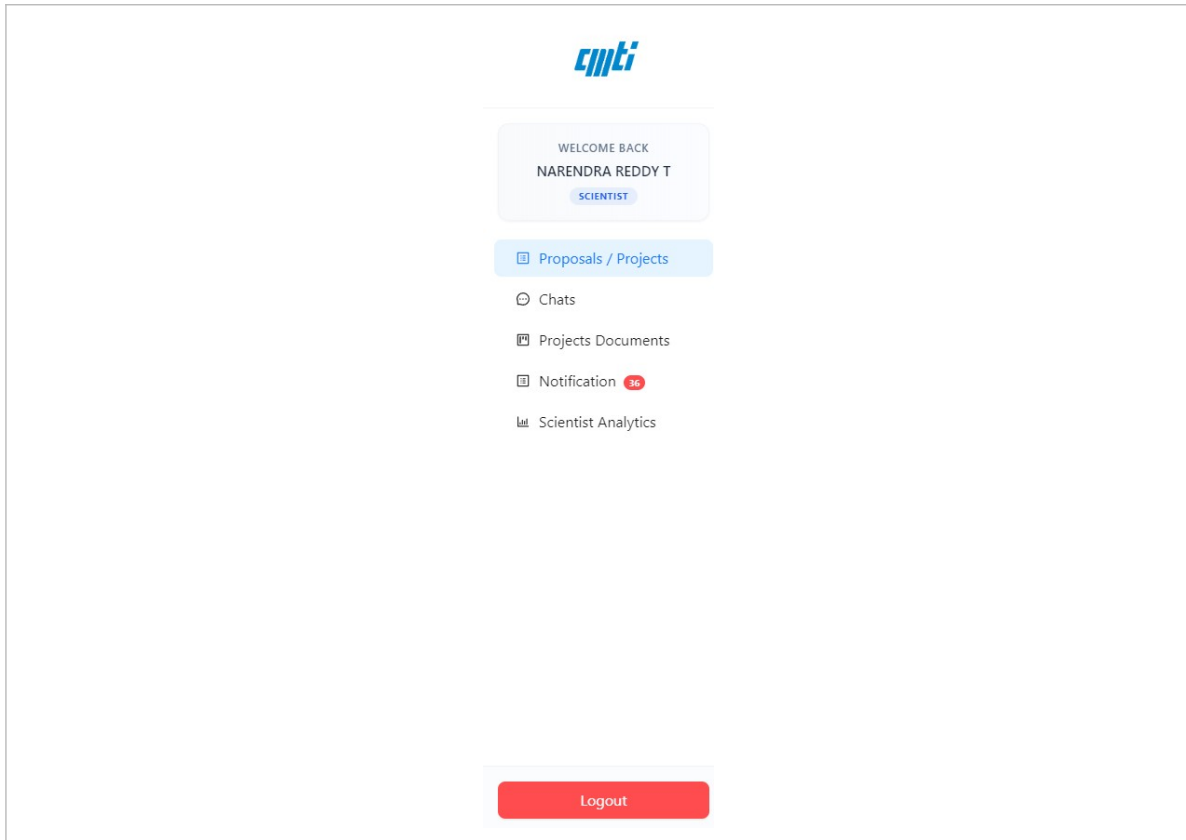

Figure 3

5. Application Modules

This section explains each module in the order it appears in the main navigation sidebar, immediately after login.

5.1 Proposals / Projects

Purpose: The Proposals / Projects section provides the Group Head with a centralized view of all proposals and projects belonging to their group.

How to access: Click Proposals / Projects at the top of the main navigation sidebar.

The Group Head can:

- View proposals under the group
- View converted projects
- View ongoing projects
- View completed projects
- View project information
- View proposal information
- View project coordinator information
- Inspect project details

- Review project status and financial information

IMPORTANT

This section is view-only for Group Heads. Group Heads cannot create proposals from the Group Head account; proposal creation must be performed using a Scientist account. Group Heads also cannot upload proposal or project documents from the Group Head account. If document upload is required, the user must log in using the appropriate Scientist account.

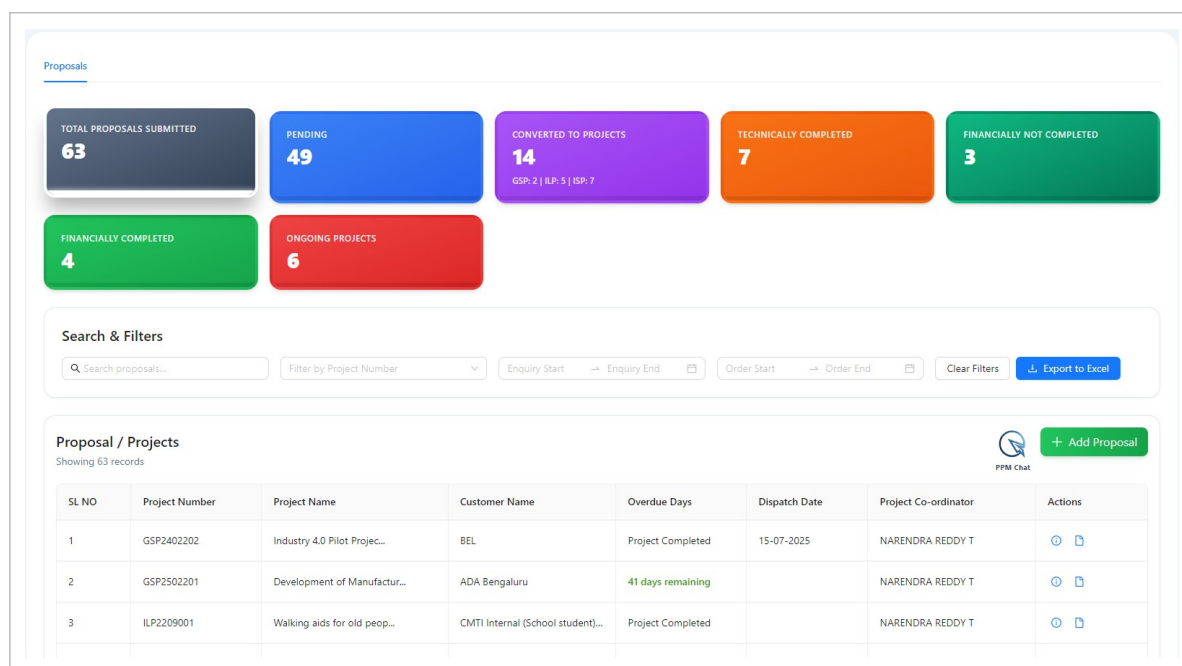

Figure 4

5.2 Chats

Purpose: The Chats module allows the Group Head to communicate regarding projects and proposals belonging to their group.

How to access: Click Chats in the main navigation sidebar.

The Group Head can communicate with:

- Project Coordinators
- Scientists / project team members were permitted
- Admin of their group projects

Chats can be associated with specific projects or proposals. The Group Head can:

- View individual project communication
- Take part in group/project-related chats
- View previous messages
- Send messages
- Share information through chats where the system permits it

NOTE

Group Heads cannot create proposals through chat.

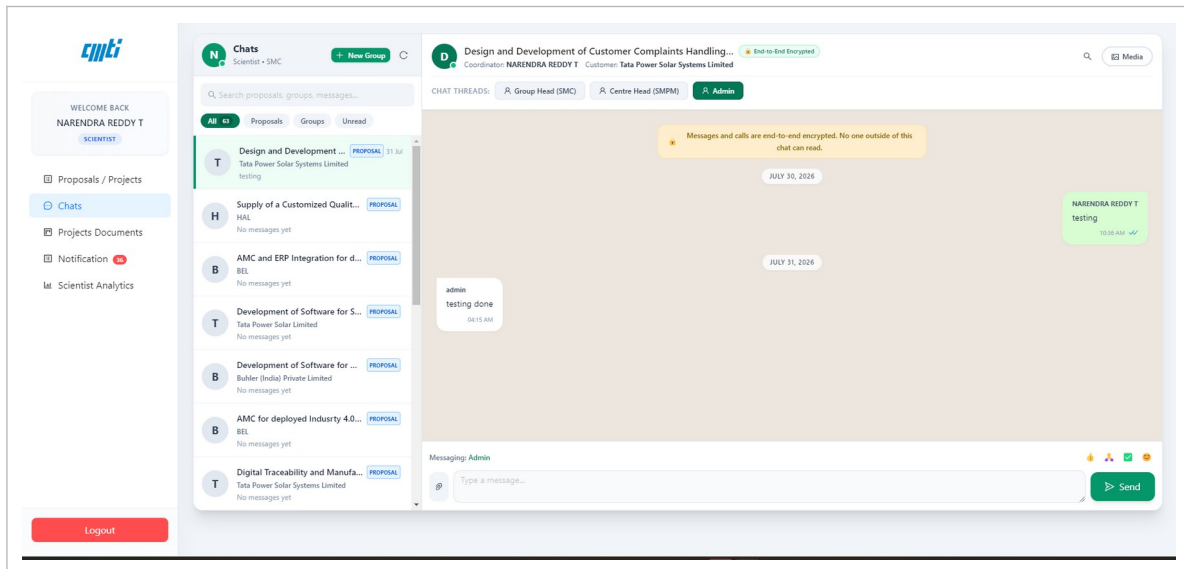

Figure 5

5.3 Projects Documents

Purpose: The Projects Documents section allows the Group Head to view project-related documents for all projects belonging to their group.

How to access: Click Projects Documents in the main navigation sidebar.

The Group Head can view documents associated with their group's projects, such as:

- Enquiry
- Proposal
- Purchase Order (PO)
- PO Acknowledgment
- Project Cost Estimation Sheet
- Closure Report
- Other project documents available through the system

IMPORTANT

The Group Head has view-only access to project documents. Group Heads cannot upload documents from the GH account. If a document needs to be uploaded, the user must log in using the appropriate Scientist account. Where supported by the system, documents can be opened and viewed through the document viewer.

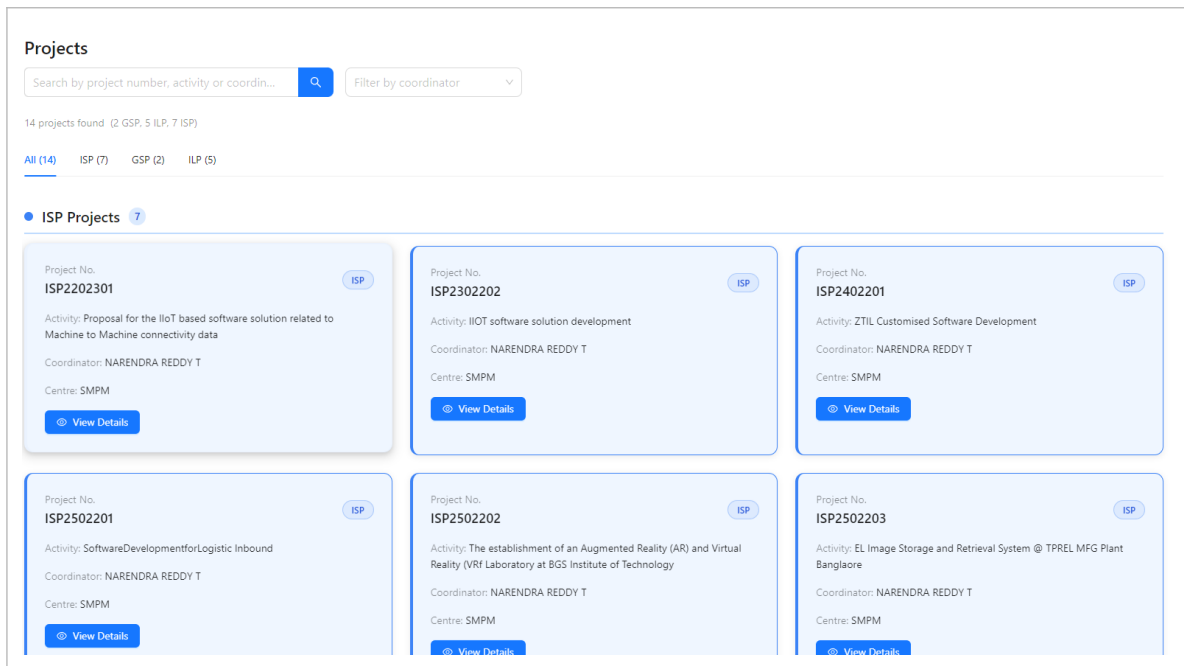

Figure 6

5.4 Notification

Purpose: The Notification module keeps the Group Head informed about activities related to projects and proposals belonging to their group.

How to access: Click Notification in the main navigation sidebar. A red badge next to it shows the current count of notifications.

Notification types include:

- Project updates
- Delivery and overdue alerts
- Proposal activity
- Project activity
- Document uploads or updates
- Other relevant group project notifications

Notifications displayed to the Group Head are relevant to their assigned group only.

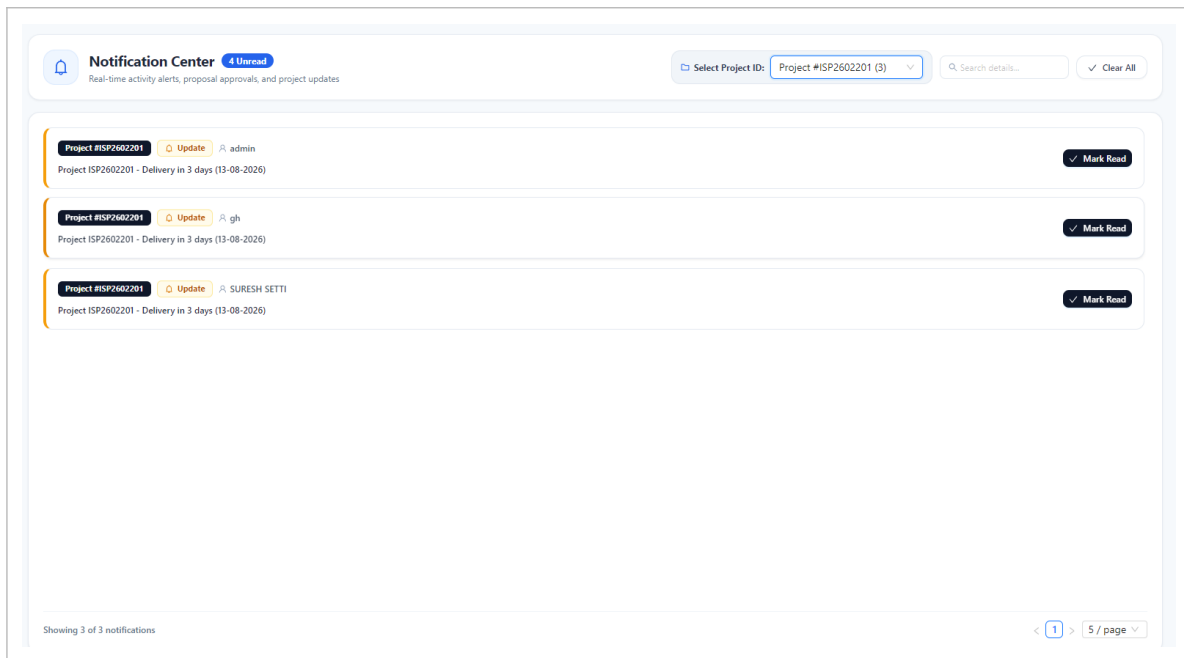

Figure 7

5.5 Group Head Analytics

Purpose: Group Head Analytics provides a group-level, real-time visual overview of proposals and projects belonging to the Group Head's assigned group.

How to access: Click Group Head Analytics in the main navigation sidebar.

The Group Head can analyze:

- Proposal counts
- Project counts
- Project status
- Financial amounts
- Coordinators
- Project codes
- Individual projects / activities
- Group-level trends
- Completed and ongoing projects
- Pending / non-converted proposals

KPI Cards / Overview

The top-level analytics provide an overall view of the Group Head's group, including categories such as:

- Proposals Received
- Converted to Projects

- Ongoing Projects
- Completed Projects
- Technically Completed
- Financially Not Completed
- Financially Completed
- Pending / Non-Converted Proposals

Where applicable, values can be displayed as a Count or a Financial Amount. Financial amounts are presented in Crores where the application uses the Crore format.

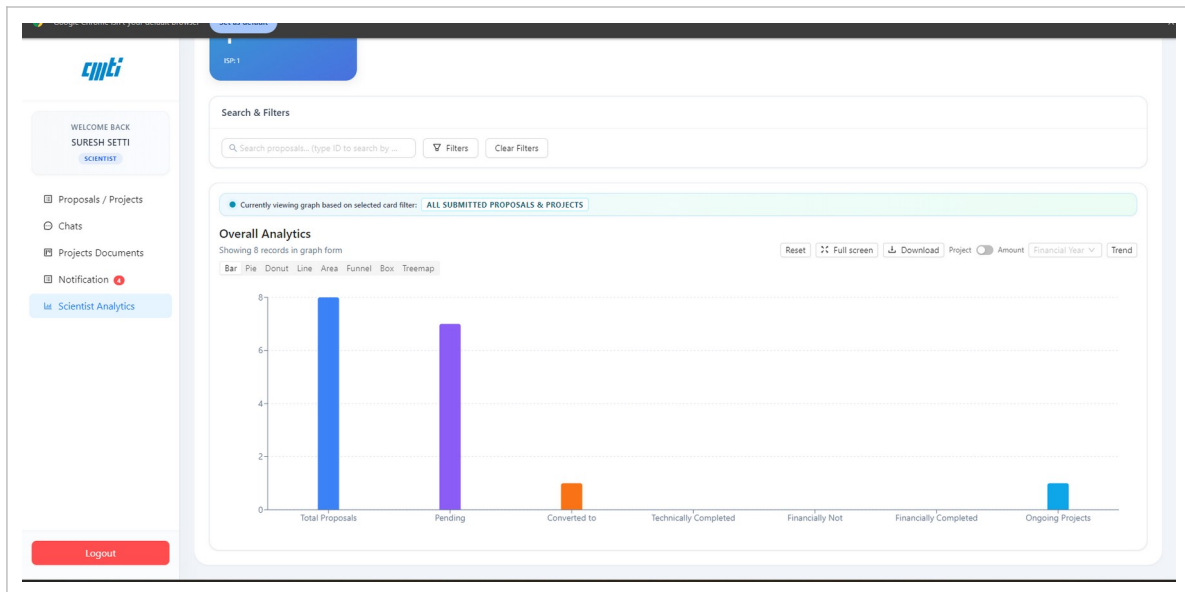

Figure 8

Metrics Switcher

- **Count:** Displays the number of proposals/projects.
- **Financial Amount:** Displays the financial value associated with the selected data, formatted in Crores where applicable.

Chart Types

The Group Head can use multiple chart formats to analyze group-level data:

- Bar Chart
- Pie Chart
- Donut Chart
- Line Chart
- Area Chart
- Funnel Chart
- Box Plot
- Treemap

Drill-Down Navigation

The Group Head follows this navigation path:

Top Level → Coordinator Level → Category Level → Project Code Level → Project Name / Activity Level

A. Top Level

The Top Level provides an overall view of the Group Head's assigned group. It shows overall statistics or financial amounts across categories such as Proposals Received, Converted to Projects, Ongoing Projects, Completed Projects, and other available project status categories.

Chart Dimension: Category. The Group Head can click a category to drill further into the data.

B. Coordinator Level

When the Group Head clicks a category, the system drills down to the Coordinator Level. The data is grouped by Coordinator / Proposal Giver. For proposals that do not yet have a project number, the system uses quotation_given_by_name. For converted projects that have a project number, the system uses project_co_ordinator.

Chart Dimension: Project Coordinator. This allows the Group Head to see how proposals and projects are distributed among coordinators within their group.

C. Category Breakdown

When the Group Head selects a specific coordinator, the system displays a category/status breakdown for that coordinator. The selected coordinator becomes the focus of the analysis. Possible categories may include ISP, GAP, GSP, ILP, DPP, LSP, CLP, SO, and other available categories/statuses.

D. Project Code Level

When the Group Head selects a category for a coordinator, the system drills down to the Project Code Level. Projects are grouped according to their project code/prefix, for example ISP, GAP, GSP, ILP, DPP, LSP, CLP, or SO.

Chart Dimension: Project Code. This view helps the Group Head understand how projects are distributed across different project codes.

E. Project Name / Activity Level

When the Group Head selects a Project Code, the system displays the individual projects or activities under that code.

Chart Dimension: Activity. The Group Head can use this level to identify individual projects/activities within the selected coordinator and project-code category.

Non-Converted / Pending Proposals

Trigger: When the Group Head clicks the Pending bucket or the relevant Proposals category at the Coordinator Level.

Behavior: The system opens the Non-Converted Proposals / Pending Proposals modal. The modal displays stage-wise documents and relevant details for proposals that have not yet been converted

into projects and belong to the selected coordinator/group. The Group Head can inspect the available information but cannot create or modify proposals from this view.

Drill-Back Navigation

For a Group Head, the Back control moves from Coordinator Level directly to the Top Level. The Group Head does not need to select Center or Group, because the Group Head is already restricted to their assigned group. Therefore, the GH drill-down navigation bypasses Center and Group selection.

- Back returns to the previous applicable analytics level.
- Breadcrumbs can be used to navigate back to an earlier drill-down level.
- Reset clears the drill-down selections and returns to the top-level group overview.

Project Details

The Group Head can open project details were available. This is viewing information, not editing. The project detail view may contain:

General Information

- Project Number
- Proposal ID
- Customer Details
- Delivery Dates
- Project Coordinator

Technical Information

- Technical status
- Closure Report status
- Technical Completion Year

Financial Information

- Quote Amount
- Order Value
- Revised Amount
- Financial Completion Year

Payment Information

Where available, payment milestone information may include:

- Invoice Number
- Invoice Date
- Gross Amount
- Payment Clearance Status

Filters

The Group Head can use the following filters to narrow the information displayed in charts and tables:

- Date Range
- Status
- Small Value Projects
- Search

The search may include Project Number, Customer Name, Proposal Description, or Project Code.

Excel Export

The Group Head can download filtered drill-down project tables to an Excel (.xlsx) file where the export option is available. The export contains the currently filtered/selected project information. The Group Head cannot modify records through the exported Excel file.

6. Note

NOTE — GROUP DATA SCOPE

The Group Head can view only the proposals, projects, documents, chats, notifications, and analytics associated with their assigned group. The Group Head does not have access to projects belonging to other groups.

Group Head Permissions

Function	Group Head Access
View Group Proposals	Yes
View Group Projects	Yes
View Project Details	Yes
View Project Analytics	Yes
View Project Documents	Yes
View Notifications	Yes
Chat with Project Coordinators	Yes
Chat with Group Project Admin	Yes
View Financial Information	Yes
Use Analytics Drill-Down	Yes

Function	Group Head Access
Export Filtered Data to Excel	Yes, where available
Create Proposal	No
Create Proposal Document	No
Upload Proposal Document	No
Upload Project Document	No
Edit/Create Scientist Proposal Records	No
View Other Groups' Projects	No

Q: Which proposals and projects will I see when I log in?

A: You will see proposals and projects belonging to your assigned group. Projects from other groups are not displayed.

Q: Can a Group Head create a proposal?

A: No. The Group Head account is view-only for proposals and projects. To create a proposal, log in using a Scientist account.

Q: Can a Group Head upload project documents?

A: No. Document upload is not available to the Group Head account. If a document needs to be uploaded, log in using the appropriate Scientist account.

Q: Can I view documents for all projects in my group?

A: Yes. The Projects Documents section provides access to project documents belonging to projects within your group, subject to the documents available in the system.

Q: Can I chat with project coordinators?

A: Yes. The Chats module allows the Group Head to communicate regarding projects and proposals with project coordinators, admin, and other permitted group participants.

Q: Can I view projects from another group?

A: No. Your data is automatically restricted to your assigned group.

Q: What does the Analytics drill-down show?

A: The analytics drill-down allows you to move from the overall group view to coordinators, categories, project codes, and finally individual project names/activities.

Q: Can I switch between project count and financial amount?

A: Yes. Use the Count / Financial Amount metrics switcher in Group Head Analytics.

Q: Can I export project information?

A: Yes. Where the export option is available, filtered drill-down project tables can be downloaded as an Excel file.

Q: What happens when I click Pending?

A: The system opens the pending/non-converted proposal information so that you can review proposals that have not yet been converted into projects.

7. Conclusion

This manual has covered how to log in to the Proposals & Projects Management System, navigate Group Head Analytics, view proposals and projects, work with project documents, use the Chats module, and understand notifications and statuses. Following the steps and descriptions in this guide will help you use the system efficiently as a Group Head.

The Group Head module provides a centralized view of the group's proposals and projects, enabling the Group Head to coordinators, project progress, documents, communications, notifications, financial information, and analytics. The Group Head role is primarily for visibility, communication, and analysis, while proposal creation and document upload requiring Scientist permissions must be performed using a Scientist account.

For any issues not covered in this manual, please contact your system administrator or PPM team for further assistance.
