1. Introduction

1.1 Purpose of the Application

The Proposals & Projects Management System is a centralized platform used to record, track, and manage proposals and the projects that result from them. It allows scientists and project coordinators to create proposals, monitor their progress from submission through approval, convert accepted proposals into active projects, and track each project through technical and financial completion.

1.2 Purpose of the User Manual

This manual explains how to use the Scientist module of the system. It covers logging in, navigating the dashboard, creating and managing proposals, uploading and accessing project documents, using chat, working with analytics and charts, and understanding notifications and statuses. It is intended to help you use the system correctly and confidently without needing prior technical knowledge.

1.3 Intended Users

- Scientists who submit proposals and manage the resulting projects.

2. System Overview

2.1 Overview of the Application

The system organizes your work around proposals and projects. A proposal is created and submitted for a customer; once approved and issued a Project Number, it becomes an active project that is tracked through technical and financial completion. Supporting features include a document inventory, an internal chat system, notifications, and an analytics dashboard.

2.2 Main Features and Modules

These modules appear in the main navigation sidebar in the following order once you are logged in:

Module	Description
Proposals / Projects	Central repository to view, create, and manage all proposals and projects assigned to you, including cost estimation.
Chats	Messaging system to communicate with the Centre Head, Group Head, and PPM about specific proposals and projects, including group chats and document sharing.
Projects Documents	Version-controlled inventory of documents such as Enquiry, Proposal, PO, PO Acknowledgment, Cost Estimation Sheet, and Closure Report.
Notification	Alerts relating to delivery/overdue status, proposal creation and edits, and document uploads, with a badge showing your current

Module	Description
	count.
Scientist Analytics	Personalized, real-time visual overview of your proposals and projects with interactive KPI cards and charts.

3. Login

3.1 Login Procedure

1. Open the Proposals & Projects Management System using the link or shortcut provided by your organization.
2. Enter the credentials issued to you by your system administrator.
3. Submit your credentials to sign in to the system.

3.2 Required Credentials

You will need the username and password provided to you by your system administrator. If you do not have login credentials, or have forgotten them, contact your administrator or the PPM team for assistance.

3.4 Resetting a Forgotten Password

If you have forgotten your password, use the Forgot Password option on the login page to reset it through a 3-step verification process: Email, Verify OTP, and New Password.

How to Reset Your Password

1. Click **"Forgot Password?"** on the login page to open the Reset Password modal.
2. Enter your registered email address and click **"Get OTP"**.
3. Enter the 6-digit OTP sent to your mailbox to verify your identity.
4. Define and confirm your new password (minimum 6 characters), then log back in with your new credentials.

3.3 Login-Related Notes

NOTE

After logging in, the system automatically identifies you as a Scientist and scopes all data — proposals, projects, KPI cards, and analytics — to only the records where you are listed as the Quotation Provider or the Project Coordinator (these both refer to you, at different stages of the same proposal/project).

Figure 1

Figure 2

4. Main Navigation Menu

Once you have logged in, a navigation sidebar is displayed on the left side of the screen. This sidebar is your starting point for every task in the system and contains the following five items, in this order:

Sidebar Item	Takes You To
Proposals / Projects	Your central list of proposals and projects, and the starting point for creating a new proposal.

Sidebar Item	Takes You To
Chats	The messaging system for communicating with the Center Head, Group Head, and PPM.
Projects Documents	The version-controlled document inventory for your projects.
Notification	Alerts and updates relating to your proposals and projects, marked with a count badge.
Scientist Analytics	Your personalized analytics dashboard with KPI cards, charts, and drill-down views.

NOTE

The Notification item displays a red badge with a number (for example, 35) showing your current count of unread or pending notifications. This count updates as new alerts arrive.

Figure 3

5. Application Modules

This section explains each module in the order it appears in the main navigation sidebar, immediately after login.

5.1 Proposals / Projects

Purpose: Central repository where Scientists can view, create, manage, and calculate cost estimations for all proposals submitted under their name.

How to access: Click Proposals / Projects at the top of the main navigation sidebar.

Available options and displayed information:

- Total Proposals Submitted, Pending Proposals, Converted to Projects, and Overdue Warnings, shown as interactive summary cards at the top of the page.
- An Overdue Warnings badge visually highlights proposals that have exceeded their delivery dates.

Actions you can perform:

- Create a new proposal using the Add Proposal button.
- Respond to the Reason Required alert for delayed or non-converted proposals.
- View pending/unacknowledged proposals by clicking the Pending KPI card.

Figure 4

KPI Cards

Interactive summary cards at the top of the page display key metrics for your portfolio. Clicking any card filters the charts and tables below to focus on that stage.

KPI Card	Description
Total Proposals Submitted	Total count and value of all proposals logged under your name (Pending + Converted to Projects).
Pending Proposals	Proposals submitted that are awaiting PO / customer approval.
Converted to Projects	Proposals that were accepted and assigned a Project Number.
Technically Completed	Projects where technical work and deliverables are complete.
Financially Not Completed	Projects completed technically, but with pending financial settlements.
Financially Completed	Projects fully closed both technically and financially.
Ongoing Projects	Active projects currently in progress.

Clicking the Pending KPI card also shows an Unacknowledged count — proposals you submitted that have not yet been acknowledged by the PPM (a quotation has not yet been generated for the customer).

A. Add Proposal

Purpose: Scientists create a new proposal directly.

How to access: Click the green Add Proposal button on the Proposals / Projects page.

Available options: You are given a choice between two entry methods:

- **Add Proposal Form (Manual Entry)** — fill in the proposal details directly in a form.
- **Create Document** — generate a proposal document within the system.

The screenshot shows a modal window titled "Add Proposal" with a close button (X) in the top right corner. Inside the modal, the heading "Choose Proposal Creation Method" is centered, followed by the instruction "Select how you would like to create this new proposal:". Below this, there are two main options presented in rounded rectangular boxes:

- Manual Entry:** Indicated by a pencil icon. The text below the icon says "Manual Entry" and "Fill in all proposal details manually from scratch using standard form inputs." At the bottom of this box is a blue button labeled "Create Manually".
- Create Document:** Indicated by a document icon. The text below the icon says "Create Document" and "Generate and build official proposal documents (.docx) with live preview." At the bottom of this box is a purple button labeled "Create Document".

In the bottom right corner of the modal, there is a "Cancel" button.

Figure 5

A.1 Manual Entry (Add Proposal Form)

1. Click Add Proposal, then choose Add Proposal Form.
2. Enter the required details: Customer Name, Enquiry Date, Customer Type (Govt, PSU, or Private), Quote Description, Reference Number, Email, and Quote Amount.
3. Your name is automatically assigned to the Quotation Provider field (quotation_given_by_name); no action is needed for this field.
4. Click Submit.
5. On the form that follows, upload the enquiry and proposal documents as attachments.

A.2 Create Document

1. Click Add Proposal, then choose Create Document.
2. Create the proposal document within the system.
3. Download the generated document.
4. Submit the proposal.

B. Reason Required Alert

Purpose: Prompts you to explain why a proposal has been delayed or has not converted into a project.

How to access: A blinking red Reason Required (X) button appears in the action header whenever one or more of your proposals are delayed or not converted, without a logged explanation.

Available options and actions:

1. Click the blinking Reason Required (X) button.
2. The Reason Input Modal opens.
3. Enter the reason for the delay or non-conversion.
4. Save the reason to update the proposal record.

C. Unacknowledged Proposals

Purpose: Shows proposals that you have submitted which the PPM has not yet acknowledged (a quotation for the customer has not yet been generated).

How to access: Click the Pending KPI card. The Unacknowledged view is displayed along with the count of such proposals.

5.2 Chats

Purpose: A chat system for communicating between the Center Head, Group Head, and PPM about specific proposals and projects.

How to access: Click Chats in the main navigation sidebar.

Available options:

- **Group Chat:** Create a group by adding other scientists and group members to discuss a specific proposal or project.
- **Document Sharing:** Share documents directly within a chat conversation.

Figure 6

5.3 Projects Documents

Purpose: A project inventory where all project-related documents are stored, accessed, and uploaded, so that documents are easy to find and are kept under version control.

How to access: Click Projects Documents in the main navigation sidebar.

Documents typically found in this inventory include:

- Enquiry
- Proposal
- PO (Purchase Order)
- PO Acknowledgment
- Project Cost Estimation Sheet
- Closure Report

Payment information is updated by the PPM and can be accessed by you within this module. All documents in this inventory are version-controlled.

Figure 7

Figure 8

5.4 Notification

Purpose: Keeps you informed of activity related to your proposals and projects.

How to access: Click Notification in the main navigation sidebar. A red badge next to it shows your current count of notifications.

Notification types include:

- Delivery & Overdue Alerts

- Proposal Creation / Edits
- Document Uploads

Figure 9

5.5 Scientist Analytics

Purpose: Provides a personalized, real-time visual overview of all proposals and projects assigned to you.

How to access: Click Scientist Analytics in the main navigation sidebar.

NOTE

Data Privacy & Scope: Your analytics view is automatically filtered. You will only see proposals and active projects where you are assigned as the Quotation Provider (quotation_given_by_name) or Project Coordinator (project_co_ordinator) — the two labels used for you at the proposal and project stages respectively.

KPI Cards

Interactive summary cards at the top of the page display key metrics for your portfolio. Clicking any card filters the charts and tables below to focus on that stage.

KPI Card	Description
Total Proposals Submitted	Total count and value of all proposals logged under your name (Pending + Converted to Projects).
Pending Proposals	Proposals submitted that are awaiting PO / customer approval.

KPI Card	Description
Converted to Projects	Proposals that were accepted and assigned a Project Number.
Technically Completed	Projects where technical work and deliverables are complete.
Financially Not Completed	Projects completed technically, but with pending financial settlements.
Financially Completed	Projects fully closed both technically and financially.
Ongoing Projects	Active projects currently in progress.

Figure 10

Clicking the Pending KPI card also shows an Unacknowledged count — proposals you submitted that have not yet been acknowledged by the PPM (a quotation has not yet been generated for the customer).

Charts

- **Chart Types:** Toggle between eight chart views — Bar, Pie, Donut, Line, Area, Funnel, Box Plot, and Treemap.
- **Project Count vs. Amount Toggle:** Switch chart values between Project Count and Financial Amount (₹).
- **Financial Year Filter:** Select a specific financial year (e.g., 2024–2025) to filter chart data.
- **Trend View:** Analyze year-over-year trends for a specific category (e.g., Technically Completed projects over time).
- **Full Screen & Export:** Expand a chart to full screen, or download it as an image.

Drill-Down Navigation

- **Top-Level View:** Displays an overall breakdown by status (Pending, Converted, Technically Completed, Financially Completed).
- **Category Drill-Down:** Clicking a category slice (e.g., Converted to Projects) drills down to a breakdown by Project Code.
- **Pending Proposal Inspection:** Clicking the Pending slice/bar opens the Pending Proposals Modal directly.
- **Navigation Controls:** Use Back to return to the main view, or Reset to clear all drill-down filters.

Tables and Modals

Pending Proposals Modal — Opens a table listing all submitted proposals not yet converted into active projects, showing: SL NO, Enquiry Date, Customer Type (Govt, PSU, Private), Customer Name, Quote Amount, and Proposal Status (Awaiting, Under Review). An Action (View) button opens full proposal details.

Project Detail Modal — Clicking View on any project opens a full project card with:

- **General Info:** Project Number, Proposal ID, Customer Details, Delivery Dates, Project Coordinator.
- **Technical Status:** Closure Report status, Technical Completion Year.
- **Financials:** Quote Amount, Order Value, Revised Amount, Financial Completion Year.
- **Payment Milestones Table:** Invoice numbers, invoice dates, gross amounts, and payment clearance status.

In-Browser Document Viewer — If a project or proposal has uploaded documents attached, clicking the document link opens an in-browser previewer supporting PDFs, images, text files, and Office documents.

Filters

Use the global filter bar at the top of the page to narrow down the data shown in both charts and tables:

- **Date Range Selector:** Filter by Enquiry Date, Quote Date, Order Date, or Delivery Date.
- **Status Filter:** Isolate proposals/projects by status (Ongoing, Completed, Pending).
- **Small Value Projects:** Toggle to filter for small-value projects (below ₹25 Lakhs).
- **Search Input:** Search instantly by project number, customer name, proposal description, or project code.

6. Note

Q: Which proposals and projects will I see when I log in?

A: You will only see proposals and projects where you are listed as the Quotation Provider (quotation_given_by_name) or the Project Coordinator (project_co_ordinator). Both fields refer to

you — they are simply the labels used for the proposal stage and the project stage of the same record.

Q: What are the two ways to create a new proposal?

A: You can use the Add Proposal Form for manual entry, or use Create Document to generate, download, and submit a proposal document.

Q: Why is there a blinking red button on my screen?

A: This is the Reason Required (X) button. It appears when one of your proposals is delayed or has not converted into a project without a logged reason. Click it to enter and save an explanation.

Q: What does "Unacknowledged" mean?

A: It refers to proposals you submitted that the PPM has not yet acknowledged — a quotation has not yet been generated for the customer. You can view this count by clicking the Pending KPI card.

Q: How do I switch a chart between showing project count and financial amount?

A: Use the Project Count vs. Amount toggle above the chart in Scientist Analytics.

Q: Where can I find documents such as the PO or Closure Report?

A: These are stored in the Projects Documents inventory, along with Enquiry, Proposal, PO Acknowledgment, and Cost Estimation Sheet documents. All documents there are version-controlled.

Q: How do I discuss a specific proposal or project with my team?

A: Use the Chats module. You can message the Center Head, Group Head, or PPM directly, create a group chat with other scientists, and share documents within the conversation.

7. Conclusion

This manual has covered how to log in to the Proposals & Projects Management System, navigate the Scientist Analytics, create and manage proposals, work with project documents, use the Chats module, and understand notifications and statuses. Following the steps and descriptions in this guide will help you use the system efficiently as a Scientist.

For any issues not covered in this manual, please contact your system administrator or PPM team for further assistance.
